

Problem Solved.

turn-key gas service for off-grid
resort and golf communities

Receive the tremendous marketing advantages of dual-fuels while steering your luxury resort or golf course community away from the inefficient electric grid toward more sustainable development fueled by gas. HBH Gas Systems is the leader in central gas systems, serving resort developments of all sizes worldwide. Our systems fuel your full range of energy needs from a single, underground propane tank.

Not only can our gas systems fuel all high-end appliances, they serve the full range of a resort's energy demands: spa facilities, pool heaters, restaurants, outdoor kitchens, gas lamps, and even eco-friendly propane-powered golf carts. Visit us at www.hbhsystems.com to learn how we can provide you with seamless, reliable, metered gas service- any time, any place.
